Present

Code example

Complete the solution so that it reverses the string passed into it:

```javascript
function solution(str) {
    let strArray = str.split('').reverse().join('');
    return strArray;
};
```

Projects

Marvel App
Educational project, that is using marvel api to show information about characters of marvel comic books
https://github.com/ka4ernov/marvel

Tax calculator
Calculator helps to count taxes when selling real estate
https://kchernov.ru/nalogovyj-kalkulyator/

Mother capital calculator
Calculator helps to count the share of real estate that parents have to give to their children after using mother capital
